WHAT IS THIS

Kiro = an AI code editor powered by Claude

Kiro is built by **AWS (Amazon)**. It's an IDE + CLI + web app where you describe what you want in plain English, and AI turns it into specs, then real working code. Under the hood it runs on Anthropic's **Claude** models. The best part — there are **four legit ways** to use it for free.

BEST FOR EVERYONE

1

The Free Tier (forever free)

Just download and sign in. You get **50 credits every month, free**, with access to **Claude Sonnet 4.5** plus open-weight models. No credit card needed.

Claude Sonnet 4.5

Qwen3 Coder

DeepSeek v3.2

MiniMax 2.1

ONE-TIME BONUS

2

\$20 Sign-up Credit

The first time you upgrade to any paid plan via Google / GitHub / AWS Builder ID, Kiro credits **\$20 toward your subscription** — effectively your first month of Pro can be free or near-free.

STUDENTS

3

1,000 credits/month for a full year

Verified university students get **1,000 credits per month free for 12 months** — that's the Pro plan, free. Verify with your college email via SheerID. **No credit card required.**

FOUNDERS

4

Startups: up to a year of Pro+ free

Building a startup? Apply through Kiro's startup program for **up to a year of free Kiro Pro+** (2,000 credits/month). Subject to their terms.

THE MODELS YOU GET

Claude — and a lot more

On the free tier you get the latest Claude Sonnet for serious coding, plus fast open-weight models for lighter tasks. Paid tiers unlock the premium lineup including Claude Opus.

SET IT UP IN 4 STEPS

From zero to coding with Claude

- 1 **Download Kiro** for macOS, Windows or Linux from kiro.dev/downloads. Prefer terminal? Run `curl -fsSL https://cli.kiro.dev/install | bash`
- 2 **Sign in** with Google, GitHub, or AWS Builder ID. Using a social login unlocks Claude Sonnet 4.5 on the free tier. You do **not** need an AWS account.
- 3 **Pick your model** — choose **Claude Sonnet 4.5** directly, or **Auto** to let Kiro balance speed and cost across models.
- 4 **Describe what you want** in plain English. Kiro writes a spec, plans tasks, and builds the code with you. Students: verify your .edu email to jump to 1,000 credits/month.

MAKE YOUR FREE CREDITS LAST

- 💡 **Use Auto mode for small tasks.** A task in Auto costs fewer credits than the same task on a premium model — save Claude for the heavy lifting.
- 📝 **Write clear specs first.** Good prompts mean fewer retries, and fewer retries means fewer credits burned.
- 🔄 **Credits reset monthly.** They don't roll over, so plan bigger builds near the start of your cycle.

QUICK COMPARISON

Which free route is yours?

Pick the path that fits you. Most people start with the Free tier and upgrade only if they hit the limit.

PLAN	COST	CREDITS/MO	CLAUDE	BEST FOR
Free	₹0	50	Sonnet 4.5	Trying it out, light use
Students	₹0 / 1 yr	1,000	Sonnet 4.5	College students (.edu)
Startups	Free*	2,000	Premium	Founders (apply)
Pro	\$20	1,000	+ Opus	Daily serious building
Power	\$200	10,000	+ Opus	Heavy / pro workflows

*Startup program: up to a year of free Pro+, subject to approval & terms. Paid prices exclude tax. India is supported for paid plans.

BEFORE YOU START

-  **Free tier is genuinely free** — no card, no trial trap. It just has a monthly credit cap.
-  **Students get the best deal** by far — 20x the free credits for a full year. Always check this first if you're enrolled.
-  **Check data settings.** You can opt out of having your code used for model training in Kiro's privacy settings.

Start building with Claude today

Download Kiro, sign in, and you're coding with Claude in minutes — for free.
